🔗 MohitSharma-21

Summary

Software Engineer with strong expertise in building scalable applications and deep interest in leveraging AI and emerging technologies. Driven by a growth mindset, I continuously upskill and contribute to innovative and high-impact solutions.

Education

Indian Institute of Technology (BHU) Varanasi

B.Tech- Electronics and Communication Engineering

2020 - 2024

CGPA - 8.42

Experience

Software Engineer

Microsoft

Hyderabad, India

July 2024 – Present

- Implemented automated workflows using Microsoft's internal framework to trigger and track test case execution across remote machines. Additionally, built Power BI dashboards using Kusto queries for real-time visibility into execution status and failure trends, and integrated an alerting system to proactively detect anomalous test failures.
- Performed end-to-end testing, validation, and troubleshooting for a terminal-based tool supporting Microsoft Teams video-calling features, successfully identifying and resolving critical test failures for release readiness.
- Enhanced hardware utilization for Microsoft Teams (H264 codec) from 88% to over 90% by analyzing hardware-related bugs and telemetry data. Also introduced new metrics to track hardware failures and encoder/decoder frame drops.
- **Exposure:** C++, Python, KQL, Power BI

Software Engineer Intern

Microsoft

Hyderabad, India

May 2023 – July 2023

- Designed and developed multi-turn conversational interactions for the TAC Co-pilot, enhancing UI/UX by implementing intuitive chiclet-based input options and aligning the interface with the M365 Co-pilot design system.
- Leveraged the Microsoft LLM framework to accurately interpret user queries by identifying intents and extracting entities, improving overall conversational performance and user experience.
- **Exposure:** React, TypeScript, REST APIs, UI/UX, Prompt Engineering

Full-Stack Developer Intern

Warelogg

Remote

Dec 2022 – Dec 2022

- Enhanced the Warelogg React web application by improving UI/UX, responsiveness, and overall functionality to deliver a smoother user experience.
- Implemented Node.js-based backend updates to manage and modify warehouse details, ensuring secure and accurate data handling through admin-level access controls.

Projects

Picture Manager Application [🔗](#)

- Developed a web-based application featuring a secure login system powered by Face Recognition technology, integrating JWT-based authentication and authorization to safeguard user/admin access and protect all API endpoints.
- Developed intelligent photo-management functionality using facial recognition to automatically categorize images into individual and group folders, and implemented event-related CRUD operations with MongoDB for optimized data handling.
- **Exposure:** Next.js, Node.js (Express.js), Face-api.js, MongoDB, Tailwind CSS

Technologies

Languages: C/C++, Python, JavaScript

Frameworks: React, NextJS, VueJS, NodeJS

Databases: MySQL, MongoDB

Tools: Visual Studio, Postman, Git/Github, Jupyter Notebook

Core Skills: Web development, Data Structures and Algorithms, Problem-Solving, OOPS, DBMS, Agile Methodology

Achievements

- Earned distinction as one of 1,050 qualified participants to complete the highly competitive Microsoft Engage '22 program from a nationwide pool of 30,000 applicants.
- Solved 800+ coding challenges on platforms like LeetCode, GeeksforGeeks, showcasing strong problem-solving skills.
- Finalist in national-level technical competitions "Pixelate" (Technex'22) and "Mosaic" (Udyam'22), both organized by IIT (BHU) Varanasi.
